Scenarios:

Jhonny, 22. Fresh out of college he struggles to find a job in his chosen profession.

Shouko, 35. Went back to college and seeks to find a job with her newly gained degree.

Mack, 25. Graduate student who seeks to find a job before officially getting his degree.

Nikky, 20. Seeks to find an internship while still in college.

User stories:

Jhonny struggles to find a job that pays him what he was promised graduating from college.

Shouko believes the recruiters do not have her best interest in mind

Mack does not like many popular companies vision and thus cannot find a fitting company

Nikky is not tech savvy and wonders if there is an easier way to navigate job search apps

Feature list:

Add a filter that allows a minimum wage so Jhonny can find the job that pays him fairly

Add a feature that allows users to see the jobs that require high degrees and low experience

Make sure the companies have their vision clearly stated in every job application so the job seekers can see it right away

Set the front end to be as easy to use as possible for non-tech savvy users
